Professional Summary

A highly resourceful, flexible, innovative, and enthusiastic System Administrator. Possessing considerable experience managing projects from beginning to end, defining the project plan, timeline, scope and executing the analysis before providing detailed specifications. I have an impressive track record of delivering major operational improvement and orchestrating people, schedules and resources for optimum productivity, efficiency and quality. Keen to find a challenging position within an ambitious company where I will be able to continue increasing my project management skills.

- Built application platform foundation to support migration from client-server product lines to enterprise architectures and services.
- Designed strategic plan for component development practices to support future projects.
- Monitored network performance and provided network performance statistical reports for both real-time and historical measurements.
- Managed firewall, network monitoring and server monitoring both on- and off-site.
